## **NATIONAL BIBLIOGRAPHY OF NIGERIA, 2002**

### **PREFACE**

**The National Bibliography of Nigeria, 2002** is the fifty-first annual cumulation of Nigeria's current national bibliography. It is the thirty second to be compiled by the National Library since It was taken over from the University of Ibadan in accordance with Section 2(2) (f) of the National Library Act No. 29 of 1970, the twenty-ninth to be published under the new title since January, 1973 and the twenty-seventh to be arranged in classified sequence. It is also the second automated edition to be compiled using the UNESCO'S Micro CDS/ISIS library application software. Previous issues had the title *Nigerian Publications*

**CATALOGUING**

Cataloguing practices in the National Bibliography of Nigeria follow the Anglo-American Cataloguing Rules, 2<sup>nd</sup> ed. (AACR2) and standard texts of the International Standard Bibliographic Description (ISBD) for:

(i) Monographic Publications	1978
(ii) Serials Publications	1981
(iii) Cartographic Materials	1982
(iv) Non-Book Materials	1982

**DESCRIPTIVE CATALOGUING**

Full bibliographic information is given for each publication listed, that is, the author's full name followed by year of birth (where this is ascertained), full title, place of publication, name of publisher and date of publication. The address of a less known publisher is given in parenthesis following the place of publication, thus:

Ibadan (P. O. Box 21010) : Link Communications

Detailed information about the collation, including the number of pages, or volumes where applicable, kinds of illustration, size and series statement, is given. In addition, the price and the International Standard Book Number (ISBN) are recorded when known. The International Standard Serial Number (ISSN) is also recorded for a new serial title.

**INTERNATIONAL STANDARD BOOK NUMBER (ISBN)**

The International Standard Book Number is a unique number given to a particular book by a publisher so as to distinguish that book from any other book. The ISBN consists of four parts: a country code, a publisher code, a title code and a check digit.

For example, ISBN 978-30649-3-2

ISBN	=	International Standard Book Number
978	=	Country identifier – Nigeria
30649	=	Publisher identifier – Model Academic Publishers Limited
3	=	Title identifier – Modern secretarial duties for polytechnics
2	=	Check digit (it provides for the computer an automatic check for the correctness of the ISBN)

**INTERNATIONAL STANDARD SERIAL NUMBER (ISSN)**

The International Standard Serial Number is a unique code for the identification of serial publications, which can be used whenever information on serials needs to be recorded or communicated. ISSN consists of eight digits quoted in two groups of four digits separated by a hyphen,

e.g. ISSN 1115-9863 is the ISSN code for the “New Woman”.

**TRACING**

Using the Library of Congress list of Subject Headings, 24<sup>th</sup> edition, the subject analysis of each publication is provided on the next paragraph following the ISBN/ISSN, binding and price information. The subject headings are preceded by Arabic numerals. Other added entries i.e. additional author entries like joint authors and title information are numbered in Roman numerals. These are to be used in preparing headings for Library catalogues and they indicate additional headings under which the publication may be represented and accessed in the catalogue e.g.

- 1. Marriage – Biblical teaching.
- 2. Courtship – Biblical teaching.
- 3. Marriage counseling
- I. Title.

**CLASSIFICATION NUMBERS**

All works listed are classified by the current editions of both the Library of Congress and Dewey Decimal Classification Schemes. For government publications, the National Library of Nigeria Classification Scheme is used in addition to the LC and Dewey Classification Schemes. Excerpts of the outlines of these classification schemes are given else where in the preliminaries.
