1981.

INTRODUCTION

This is the 4th edition of the Nigerian file of the *International Standard Serial Number*. Each file is an annual cumulation of all Nigerian registered Serials. This edition contains 129 (one hundred and twenty nine) titles of serials registered in 1981. The first edition was published in 1978.

As indicated in the previous editions of the file, the ISSN is a unique code for the identification of serial publications, and can be used wherever information on serials needs to be recorded or communicated''. A Serial has been defined as 'a publication in print or in non-print form, issued in successive parts, usually having numerical or chronological designations, and intended to be continued indefinitely''. They therefore include such materials as newspapers, journals, memoirs, directories as well as monographic series.

The ISSN Number consists of eight digits. This is usually quoted in two groups of four digits separated by a hyphen, and preceded by the acronym ISSN e.g. ISSN 0331 - 0000. The assigned ISSN number to any serial should be printed on all issues of that serial; preferably on the top right hand corner of the cover. For daily and weekly newspapers, the ISSN could also be printed in the imprint. The advantages of ISSN range from its role as an identifier of all titles, regardless of the language in which it is printed or the part of the world where it is printed to its role in libraries as a means for identifying titles, as well as ordering and acquiring new serials.

The National Library of Nigeria, which is the sole bibliographic agency for Nigeria, is the National Centre. This centre was established in 1976 for registering and assigning ISSN to serials published in Nigeria as well as any other serials.

A heart-felt appeal is made again to publishers, institutions and editors of journals to send all necessary details to the National Centre when they are making requests for ISSN. This will help to facilitate the assignment of the numbers. Page - Proofs of new and changed serials are important sources of required information about the serials which should always be sent to the National Centre.

All enquiries and correspondence should be sent to:

Nigerian National Serials Data Centre,
