## Report

of<br>a Sample Survey of<br>Unemployment<br>among School Leavers

## FOREWORD

The growing problem of unemployment is one which has given some concern to the government in recent years. Formulation of programmes to relieve the problem has been hampered by lack of quantitative information to guide positive action. Within the past two years the Statistics Division of the Ministry of Economic Planning and Reconstruction has carried out surveys aimed at finding out the incidence and duration of unemployment among school leavers who are believed to constitute the bulk of the unemployed in the Western State.
2. In the course of collecting the necessary information which are published in this report, many individuals and organisations were contacted. In particular, various schools that were selected in the sample survey and many school leavers who fall within the sample drawn from the entire school leaver population cocperated by supplying the necessary information. We hereby express our gratitude to these various individuals and agencies without whose cooperation this publication might not have been produced.
3. Suggestions for improving the quality of the data published in this report are welcomed at all times.

Chief Statistician
Ministry of Economíc Planning and Reconstruction, Ibadan, Western Nigeria.

March, 1970

.

## INTRODUCTORY NOTES

The Annual Sample Survey of Unemployment Among School Leavers was started three years ago by the Statistics Division of the Ministry of Economic Planning and Reconstruction. This report is the third one to be issued on the survey and has the same purpose as the two previous issues, namely, to find out the incidence of unemployment among school leavers from the Primary School level to the Secondary Grammar School level. Furthermore, from this survey it would be possible to find out avenues of employment open to young school leavers.
2. METHOD OF STUDY.
2.1 The method adopted in carrying out this survey is similar to that of previous surveys. Samples of schools were drawn on percentage basis, i.e. $2 \%$ of Primary Schools (4,000); $10 \%$ of Secondary Modern Schools (287); and 20\% of Secondary Grammar Schools (207); making a total of 165 schools (see Table A overieaf).
2.2 A school was chosen as the primary sampling unit. A simple but carefully designed questionnaire, the specimen copy of which is shown in Appendix IB, was mailed to 521 primary school leavers, 382 secondary modern school leavers and 616 secondary grammar school leavers. In all, 1,519 school leavers were selected out of which 732 cooperated giving a response rate of $46.4 \%$. Table $B$ (page.......) shows the analysis of the returns by political divisions and by type of school.
3. METHOD OF DERIVING ESTIMATES RECORDED IN THE TABLES
3.1 As usual, raising factors were used to "blow up" sample estimates. These factors were obtained by taking reciprocals of the ratios of sample to total population of school leavers for each type of school, making necessary adjustments for non-response. For example, if school leavers were selected from a population of $y$, the sample ratio would be $\frac{x}{y}$ and the raising factor would be $\frac{y}{x}$. In order to nullify the effect of non-response on the raising factors, $x$ is equated to the number of responses rather than to the number in sample: Hence, figures published in the tables are estimates for the entire school leaver population based on the sample survey.
4. RESULTS
4.1 Of the total students turned out in December 1968, 37.7\% were unemployed at the end of September 1969; 39.0\% were furthering their education while $10.1 \%$ were apprentices and $2.4 \%$ were working on their own account. The number in employment was about 10.8原. These are shown in Tale $C$.

NOTE:* This figure is approximately $1.8 \%$ of the 1964 schoo: leaver population of 82,292 (see Appendix II).

4.2 Other interesting facts revealed by the analysis in Tables

15-18 are that, like the two previous surveys, the highest unemployment rates were recorded for Secondary Modern School leavers, followed by Secondary Grammar School and Primary School leavers respectively.
4.3 No Secondary Grammar School leaver or Secondary Modern School leaver was returned as self employed (see Table c overleaf). As might be expected, Secondary Grammar School leavers recorded the highest percentage of employment. An explanation for this might be that the income from self employment is much smaller than the income earned by west African School Certificate holders in wage employment. Besides, this category of school leavers have better job opportunities. Furthermore, it was observed that the greatest number of people employed were serving in Government and Community services (see Table li). As in the case of Secondary Grammar School leavers, many Secondary Modern School leavers were employed in the Government and Commity services. Primary School leavers were mostly absorbed into Commerce and Comminity services - see Tables 6 and 8.
4.4 The Primary School leaver apprentices recorded in Table 7 are mostly those engaged on such activities as manufacturing and comerce.
4.5 Ibadan, the state capital, and its surrounding area have always been the largest employing divisions for all classes of school leavers.
4.6 It is striking to note that a high proportion of employed school leavers were absorbed within six months after their leaving school as reflected in Tables 11 and 12.
4.7 The search for employment largely in service activities not only shows the heavy dependence of school leavers on the service sector for employment opportunities but also indicates the general awareness among new entrants into the labour force, of the major sources of demand for their labour. 5. EXPLANATION OF TERMS, CONCEPTS AND SYMBOLS USED
5.1 In this report, some important points enumerated below should be borne in mind.
(a) A SCHOOL LEAVER:- A school leaver is defined as any person who has attended a formal course of study in a school and has left at the end of the final year. The term excludes drop-outs.
(b) EMPLOYED AND UNEMPLOYED:- This report classifies school leavers who are in occupations as "employed" (gainful activities being activities leading to a certain income either in cash or in kind). School leavers who are not in gainful employment ond are not attending institutions of higher learning are classified as "unemployed".

(c) LABOUR FORCE - CLASSIFICATION INTO OCCUPATIONAL GROUPS
(i) AGRICULTURE:- Covers Agriculture and Livestock production, Agricultural Services, Forestry, Logging, Hunting, Tapping and Fishing
(ii) MANUFACTURE:- Covers all types of manufacturing of consumer goods in form of food, drinks, clothing, furniture and all wood-works. This section also includes manufacture of machinery and all transport equipments.
(iii) CONSTRUCTION:- Covers all types of constraction projects (including repairs and demolition) whether undertaken by private bodies or Governmental authorities
(iv) COMMERCE:- Covers wholesale trade, retail trade, banks and other financial institutions, insurance and real estate.
(v) TRANSPORT AND COMMUNICATIONS:- Transport covers Railway, Bus, Road, Ocean, Water and Air transport. Communications cover posts and telegraphs, telephone, radio and television.
(vi) SERVICES:- Cover Government and Community services, Business services, Theatre and Related services, Domestic services, Restaurants, Hotel services, Laundries, Barber, Portrait and Personal services.

1. GOVERNMENT SERVICES:- Embrace Federal, State and Local Governments, including such organisations as the armed forces, police and regular administrative departments and offices of Governments. Exclude Governmental activities, other than administrative and regulatory, in such fields as transport, education, communication, health, production, marketing and financial institutions, each of which together with other similar activities, is classified in the appropriate industrial groups
2. COMMUNITY SERVICES:- Under these are public or private organisations furnishing scrvices to the community in the fields of education (Universities and all schools and colleges), medical and other health services (hospitals, clinics, nursing homes, etc., doctors, nurses, midwives, etc., working on own account), research and scientific institutions, religious organisations, welfare institutions, trade associations and professional and labour organisations, libraries, museums, political
organisations, civic, social and fraternal associations, and organisations like Y.M.C.A. (Young Men Christian Association) or Y.W.C.A. (Young Women Christian Association).
3. BUSINESS SERVICES:- Cover legal services, accounting, auditing and book-keeping services, engineering and technical services, advertising agencies, mailing services, employment agencies, news agencies, journalists and writers, fashion designers, business consultants, etc. Include also persons working on own account in these f.ields
(vii) OTHERS:- Cover activities not incIuded elsewhere.
(d) SYMBOLS USED:

P = Primary School Leavers.
$M=$ Secondary Modern School Leavers.
S = Secondary Grammar School Leavers.
6. All the information contained in the tables published in this report relate to 30 th September 1969 , i.e. an iristantaneous picture of the school leaver employment situation as at 30/9/69 is depicted in the tables.

Dear Mr./Miss

## SAMPLE SURVEY OF UNEMPLOYMENT OF SCHOOL LEAVERS, 1968

This Ministry conducts annually a survey to study the employment situation of a selected number of pupils who recently left the Primary, Secondary Modern and Secondary Grammar Schools in Western Nigeria. The aim of the survey isto find out the number of school leavers who go to other schools for higher studies and also to ascertain the number that are working and the number of school leavers that are not working.
2. You are therefore requested to fill the attached form in the manner described below:-
(i) Fill sections $A$ and $B$ if you are still attending school

## OR

(ii) Fill sections $A$ and $C$ if you are already working OR
(iii) Fill sections $A$ and $D$ if you have not started working.
3. The form has been addressed at the back to this Ministry. It does not require any postage stamp. After you have filled the form, fold it up, gum it, and post early enough to reach this office by the 17 th December, 1969.

Yours sincerely,
(Sgd.) ............. for Permanent Secretary

# Ministry of Economic. Planning and Reconstruction <br> Statistics Division, Ibadan, Western Nigeria. SAMPLE SURVEY OF EMPLOYMENT OF SCHOOL LEAVERS 1968. 

SECTION $A$ :
